

1. Retrieve all airline names in uppercase.
  2. Replace any occurrence of the word "Air" in airline names with "Aero".
  3. Find all flight numbers that coordinates with both airline 1 and airline 2.
  4. Retrieve airports that contain the word "Reginal" and "Air" in their names.
  5. Retrieve passenger names and format their birth dates as 'Month DD, YYYY'.
  6. Find flight numbers that have been delayed based on the actual arrival time.
  7. Find flights that arrived late according to their actual arrival time compared to the scheduled arrival time.
  8. Show airlines from any of: ('France','Portugal','Poland') created between '2023-11-01' and '2024-03-31'.
  9. Find top3 overweighted baggage with more than 25kg.
  10. Find the youngest passengers' full name.
  11. Find the cheapest booking price on each booking platform.
  12. Return airlines whose airline\_code contains a digit.
  13. List the top5 most recently created airlines.
  14. Return all rows where booking\_id is between 200 and 300 inclusive and check\_result <> 'Checked'.
- 
15. Baggage checks where update\_at is in the same month as created\_at but occurs earlier than created\_at.

Briefly mentioning – I used the database already created by teacher herself.

1. Retrieve all airline names in uppercase.
